MANAGED SECURITY

MANAGED SECURITY

WatchGuard[®] for MSS

The complete managed security solution to meet your customers' security needs, today and tomorrow.

WatchGuard® for MSS

With WatchGuard® for MSS you can focus more time on generating revenue, while reducing the time spent managing your customers' network security.

to numerous customer locations, and remotely manage all aspects of your customers' security from your central Network Operations Center (NOC). For advanced configuration, you can flexibly automate routine tasks and customize the management environment with bundled Application Programming Interfaces (APIs).

Remain securely connected to your customers' appliances with the WatchGuard Event Processor (WEP). You can receive and store logs from one or thousands of WatchGuard appliances. All critical appliance information is logged back to your network operations center, giving you immediate visibility into the health and status of your customers' security appliances. And as your managed security business grows, the WEP scales to accommodate increasing logging demands. Simply add more logging servers in your central NOC or at remote locations so you can be confident that your valuable security data is securely backed up.

Finally, keep your customers satisfied by easily creating customer-friendly reports that quantify the level of security you provide.

◆ Firebox® X: Integrated Security Appliances

Whether your customers have a single office or multiple offices, with the Firebox®X line of appliances, you can design solutions to meet your customers' specific needs. Firebox X appliances offer easy interoperability, enabling you to quickly deploy security to customers with distributed environments – and extend their hardware to include branch office or remote office locations with minimal effort.

By securing your customers with Firebox X appliances, you protect them with integrated security on a single appliance – saving you the cost of deploying and managing multiple point solutions to achieve the same level of protection.

Firebox X appliances can be upgraded to any higher model in the line by remote activation of a single software license key – eliminating the need to replace hardware when your customers require additional performance, capacity, or functionality.

With its full model upgrade capability, the Firebox X line allows you to reduce inventory costs, increase return on investment, and efficiently meet the evolving security needs of your customers.

◆ WatchGuard® LiveSecurity® Service: Expert Guidance and Support

Our LiveSecurity® Service gives you the support needed to stay ahead of emerging security threats, and keep your customers' security systems operating smoothly.

We offer you 24x7 technical support, security alerts, online resources and user forums, and advanced hardware replacement. Educate your customers by re-branding and distributing our timely LiveSecurity alerts and informative articles.

LiveSecurity Service enables you to focus on your core business and deliver a better quality of service to your customers.

DELIVERING SOFTWARE, HARDWARE, AND SERVICES FOR COMPLETE MANAGED SECURITY

The network security landscape is constantly changing and growing more complex as new and more sophisticated threats emerge. Yet organizations often lack the resources, expertise, or time to install and manage effective network security themselves. Many are increasingly turning to managed security service providers to keep their networks safe and secure.

As a managed security service provider, keeping your customers' networks protected can be difficult and costly. You must deliver superior customer care while constantly ensuring your customers are reliably secure with affordable security products. And as your customers' businesses grow, so do their network security needs, making your job even more challenging.

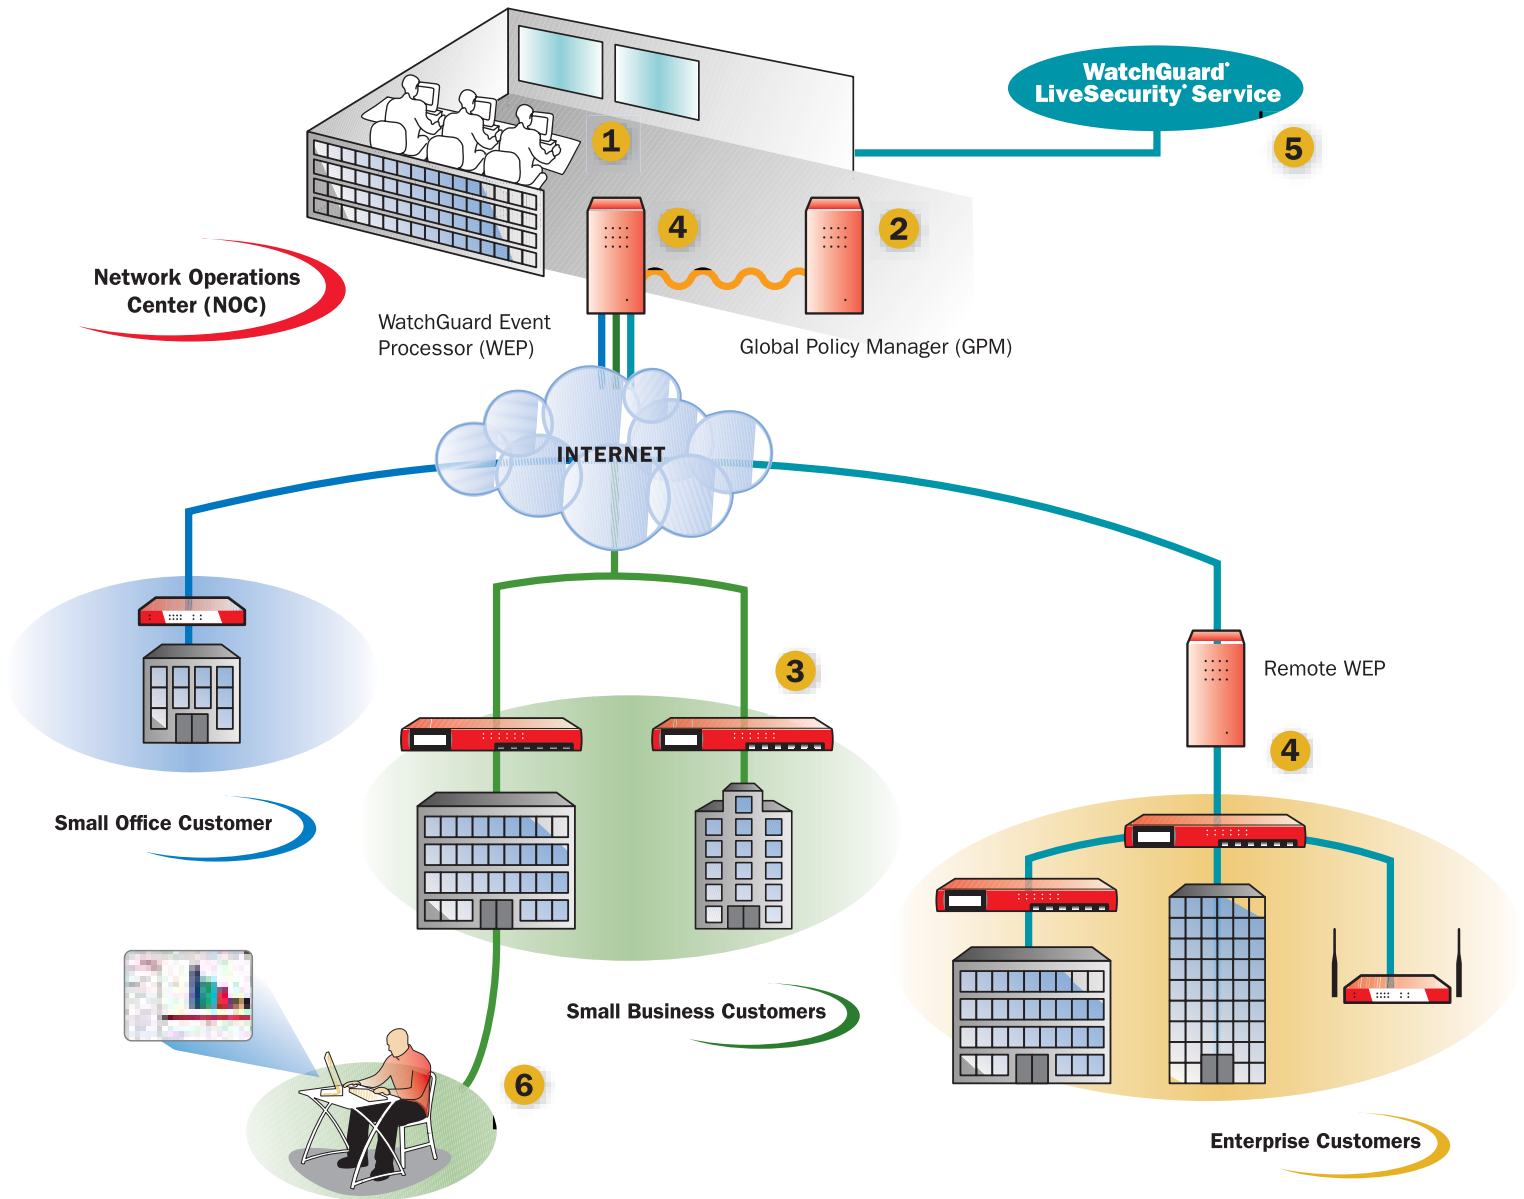

That's why you need WatchGuard® for MSS – a unique security management solution designed to reduce the complexity and expense of providing dependable network security. Through software, hardware, and expert support, WatchGuard enables you to remain in control and informed of your customers' security at all times, while growing your own business profitably.

◆ WatchGuard® System Manager – MSS Edition: NOC Security Software

WatchGuard System Manager – MSS Edition (WSM – MSS) delivers flexible, centralized security management. With the Global Policy Manager (GPM), feel empowered by a management interface that helps you quickly provision and deploy appliances

// WITH WATCHGUARD® FOR MSS, PROVIDERS CAN CENTRALLY MONITOR THE CLIENTS' SYSTEMS IN REAL TIME AND DELIVER SOFTWARE UPDATES AND MODEL UPGRADES REMOTELY. //

Current WatchGuard for MSS Provider

WatchGuard® for MSS – How it works

- 1 In the NOC, WatchGuard® System Manager – MSS Edition (WSM – MSS) provides security policy templates for fast deployment, centralized multi-customer management, and fulfillment of your service offerings. WSM – MSS is comprised of Global Policy Manager (GPM) and WatchGuard Event Processor (WEP).
- 2 GPM gives an intuitive, centralized, and real-time view of all managed customer sites.
- 3 At the push of a button, WSM – MSS automatically distributes the configuration to the customer's security appliance.
- 4 WatchGuard security appliances implement security policies and forward activity logs to the WEP, which continuously monitors the logs and automatically notifies NOC personnel when defined trigger events occur.
- 5 LiveSecurity® Service offers access to new software versions, ongoing functional enhancements for WatchGuard products, and updates to address specific threats when they occur.
- 6 Customizable HTML reports quantify the level of security you are providing as you report usage trends and track anomalous network behavior.

Grow your business profitably with WatchGuard® for MSS.
