

# WatchGuard® WebBlocker

A Firebox® X Add-On Security Service

## The Integrated, Affordable, and Comprehensive Web Filtering Service

Leaving network users free to roam the Internet can cost your organization thousands of dollars in lost productivity, reduced bandwidth, and even worse, increased legal liability. Uncontrolled Web surfing can also elevate your exposure to malicious spyware, Trojans, and virus downloads from rogue Web sites.

You need to protect your business, but most solutions require buying a separate server and doing extensive configuring. These solutions can be costly to purchase, a chore to maintain, and require expensive per user licensing. They simply don't deliver a Web filtering solution that seamlessly integrates into your existing network, is easily managed, and won't blow your budget.

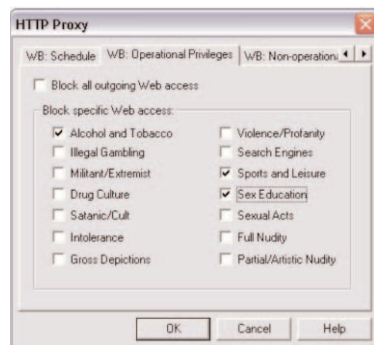

### For WatchGuard® Firebox® X owners, there's a better solution:

- **WebBlocker** easily integrates into your existing Firebox® X appliance—no extra hardware is needed. It's also priced per appliance, not per user, so you avoid the expensive licensing fees associated with other vendors. Activation with just a software license key makes turning on the function a snap.
- Web filtering controls are fully integrated into the WatchGuard System Manager, so you can use the same familiar interface to manage your Web filtering solution and all other Firebox X management tasks.
- Because WebBlocker uses the SurfControl® content filtering technology and database, you're getting the most comprehensive and up-to-date Web filtering protection available.

## Intuitive Management and Controls

Access all Web filtering tools in WatchGuard System Manager for easy, intuitive control, monitoring, and reporting.

### Web Category Control

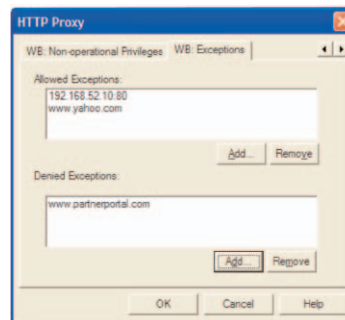

- Quickly select your content security policy from 14 distinct category filters.
- Open or block access to entire Web site categories with a mouse click.
- A locally maintained, automatically updated database contains 6.1 million sites.

WatchGuard® partners with SurfControl®—the world's number one Web filtering company—to deliver WebBlocker integrated content filtering.

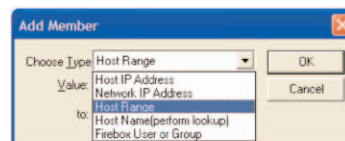

WebBlocker uses the SurfControl® CyberPatrol® database of over 6.1 million sites covering 1.2 billion Web pages—the most international coverage in the industry. Daily updates give you 24x7, up-to-date Web filtering to keep you protected.

### Flexible Custom Rules

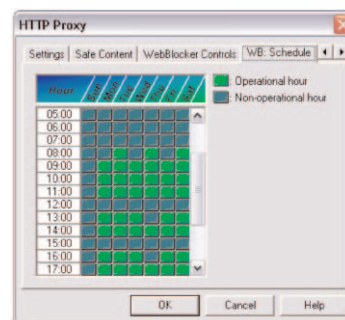

- Create custom Allowed and Denied exception lists for mission critical access to certain Web sites, host addresses, or URLs.
- Lock down access to specific URLs or host addresses for additional content security.

### Object-Based Management

- Selectively filter Web access by users, IP address ranges, or groups, and by objects such as host range.

- Control Web access by time of day, department requirements, or employee need.

## Who Needs WebBlocker?

- Organizations that want to monitor Internet usage in order to diminish financial and legal impact.
- Public institutions that need to provide nondiscriminatory access to Internet resources while complying with government regulations that protect minors.
- Schools and organizations that need to block objectionable sites while still providing educational Internet access for underage users.

## Additional Features

### Centralized Logging and Reporting

Track where your users are going and when. Generate graphical reports of Web access, usage, and time of day, and get the data you need to make security policy decisions.

### Daily Database Updates

The SurfControl® CyberPatrol® database is updated daily to give you the most current protection available.

### Free 30-Day Trial!

Supercharge your Firebox® X appliance with a 30-day WebBlocker trial, and see for yourself how WatchGuard WebBlocker can increase employee productivity and your network security. Contact a reseller today! Call 1.800.734.9905 (U.S./Canada) or +1.206.613.0895 (International), or find a reseller at [www.watchguard.com/sales/locate.asp](http://www.watchguard.com/sales/locate.asp).

### Expand Firebox® X with Add-Ons and Upgrades

Add features and services to Firebox X to expand your security appliance as your needs grow. Get spam blocking with SpamScreen, more network ports, Mobile User VPN upgrades, or renew your LiveSecurity® Service subscription. With WatchGuard solutions, you can get on with your work and rest assured that your network is protected.
